

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# Sixteenth Annual Report of the Trustees

OF THE

## MASSILLON STATE HOSPITAL

---

*To the Governor:*

We have the honor to submit to you the sixteenth annual report of the Board of Trustees of the Massillon State Hospital, together with that of the superintendent and steward.

### HOSPITAL FOR THE SICK.

The original plan for the erection of buildings at this institution contemplated the construction of two hospital buildings for the sick. We have been compelled, ever since the opening of the institution, to get along with but one such building, thus overcrowding the building with both men and women, and interfering with the proper care and comfort of these doubly afflicted patients.

We feel that the time has now arrived when we should insist upon the construction of this second hospital building for the sick, so that the male and female patients may be separated, and the original plan of the institution be carried out, and for this purpose we respectfully ask an appropriation of \$125,000.00.

### PROPOGATING HOUSE.

There is the most imperative demand for a propagating house, where vegetables and plants can be started and grown to a considerable size before being planted out of doors, as, in this latitude, the summer season is quite short and drouths are frequently encountered. A former legislature appropriated \$3,200.00 for this purpose, but the demands for economy in state expenditures were so imperative at that time that Governor Herrick was reluctantly impelled to strike that item from the list of appropriations. If you will consider how important it is that these people have fresh, wholesome vegetables, and how important the garden is for their welfare,

you cannot fail to approve the re-enactment of the law appropriating \$5,000 for this purpose. The products of the farm and garden the past year were worth \$30,000.00, and netted the institution about \$27,000.00. It will be seen from the above statement how important this item becomes, and in addition to the products above mentioned very many delicacies for bedridden patients may be produced if a proper appropriation for this propagating house be made.

#### GATEWAY.

We have recently constructed a beautiful gateway, at a cost of \$500.00.

The cost of maintenance for the last year has been increased by the amount which was found necessary and desirable to pay attendants.

#### DAIRY.

For several years we have been purchasing cattle out of current expense, with the ultimate purpose of establishing a dairy, notwithstanding we have been unable to secure appropriation for that purpose, and have been able to accumulate about 65 cows and heifers. The last legislature, however, appropriated \$2,500.00 for the purpose of purchasing cows. This year we have purchased 45 cows, and now have in all, about 110 cows and heifers, and are rapidly approaching the time when this institution, which has always purchased practically all of the milk that could be used, will be in a position to supply its entire demands.

#### MEATS.

The slaughter house now supplies all the fresh meat used at the institution, and we are glad to say that the patients and employes are supplied with as excellent beef, pork and mutton as can be had anywhere.

#### POWER PLANT.

With the purpose of making the power plant more efficient we have installed a coal crusher and coal bins, together with a number of automatic stokers, which have materially reduced the labor and expense of supplying the institution with necessary heat, light and power.

#### PURCHASE OF FARM.

With the money appropriated by the last legislature for that purpose, we have purchased the Rousch farm of 167 acres, for \$20,000, and have

rearranged the brick building thereon for the accommodation of about thirty persons, who will assist in the cultivation of the land. We have also built additions to the fine, large barn located on the farm, and now have accommodations for about 120 dairy cows.

#### PATHOLOGICAL.

A most persistent and determined effort has been made by Superintendent H. C. Eyman and our regularly employed pathologist, Dr. John D. O'Brien, to discover, if possible, a cure for the dread disease of paresis. Experiments have been made, starting with the presumption that this disease is what is known as a germ disease, with the happy result that most marked improvement has been made in the mental and physical condition of the patients at this institution who have been afflicted with that particular form of insanity. In this connection it is fair to say that Dr. John E. Russell of Mt. Vernon, Ohio, a former member of the board of trustees of this institution, was particularly insistent that such investigations and experiments as the above should be made by the pathologist of this hospital.

We feel that it but just that attention should be called to the large per cent. of cures effected upon cases that have been recently transmitted to this institution directly from their homes, that this should be an incentive to the friends of patients to see that such afflicted persons are more promptly committed to some state hospital for the cure of the insane.

For the betterment of the service at this institution we have appointed two inspector attendants, whose particular duties include a careful inspection of the physical condition of all patients at the time of admission, and a more rigid inspection into the condition of wearing apparel and general surroundings of the patients.

Since about the first of June of this year we have required the sheriff who delivers a patient at the institution to sign a full statement of the physical condition of the patient, after examination by the physician, so that in case the body of a patient shows wounds, or the presence of vermin or other disagreeable features, the blame for such condition may be more readily placed where it belongs.

On October 21st of the past year Mrs. Eyman, the estimable wife of the superintendent, Dr. H. C. Eyman, died, and in her death this institution has suffered a great loss, for she felt the greatest interest in all of the patients and employes of the institution, and ably assisted her worthy husband in all his efforts for the amelioration of suffering. During her long sickness she received the most devoted care and attention from the superintendent, whose duties have thus been doubled during the past year. Notwithstanding this sore affliction, we feel that we cannot speak too highly of the devotion of Dr. Eyman to the institution, and express the belief that much, if

not all, of the marked improvement which has taken place is due to his constant care, skill and unceasing devotion.

Dr. John E. Russell, who was for many years a trustee of this institution, retired from the board to accept a position on the board of managers of the Lima State Hospital for the Criminal Insane. We desire to pay tribute to Dr. Russell for his untiring devotion to the interests of the Massillon State Hospital. By his professional skill and experience he was enabled to make many suggestions for the improvement of the means for the care of the insane. Much credit is due Dr. Russell for the installation of the hydro-therapeutic apparatus, and for the pursuit of experiments which have constantly improved, if not entirely cured, numerous cases of paresis at this institution.

Following is a list of requirements for the ensuing year:

Current expense, 1,550 patients at \$125.....	\$193,750 00
Officers' salaries and trustees' expenses.....	10,500 00
Ordinary repairs .....	20,000 00
Furniture and carpets.....	2,500 00
Pipe and pipe covering and electrical fixtures.....	2,500 00
Tunnel, grading and cement walks, trees and vines.....	3,500 00
Vegetable propagating house.....	5,000 00
Dairy cows (50).....	2,500 00
Hospital building for men.....	125,000 00
Entrance drive .....	3,000 00
Books and pictures.....	1,000 00
Poultry house .....	500 00
Remodeling steam and hot water plants.....	10,000 00
	<hr/>
	\$379,750 00

Respectfully submitted,

GEORGE D. COPELAND, *President.*

JEROME B. ZERBE, *Vice President.*

JOHN S. ELLEN,

HARVEY J. ECKLY,

GEORGE L. FORDYCE,

*Trustees.*

*To the Board of Trustees Massillon State Hospital:*

GENTLEMEN:—I respectfully submit the sixteenth annual report of this hospital.

On the date of my last report, November 15, 1907, there were remaining in the hospital 1,510 patients, of whom 779 were men and 731 were women. There were admitted during the year 403 patients, of whom 249 were men and 154 were women. The whole number under treatment was therefore 1,913.

There were 391 discharged during the year, of whom 219 were men and 172 were women. Of this number 169 recovered, 68 were discharged improved, 22 unimproved, and 132 died.

Of those recovered 106 were men and 63 were women. Of those improved 32 were men and 36 were women. Of those unimproved 14 were men and 8 were women. Of those who died 67 were men and 65 were women.

The percentage of recoveries on number admitted was 42.5 for men and 40.8 for women; for both, 41.6. The percentage of deaths on total number under treatment was 6.90.

The causes of death were as follows:

Organic Brain Disease.....	12	Senile Dementia .....	9
Apoplexy .....	11	Pneumonia .....	20
Uremia .....	3	Septicemia .....	5
Pernicious Anemia .....	2	Paresis .....	16
Tuberculosis .....	12	Organic Heart Disease.....	14
Peritonitis .....	3	Pleurisy .....	1
Exhaustion .....	15	Carcinoma .....	3
Pyemia .....	1	Strangulation .....	1
Epilepsy .....	1	Enterocolitis .....	2
Appendicitis .....	1		

The ages of those admitted were as follows:

Between 15 and 20 years.....	12	Between 45 and 50 years.....	43
Between 20 and 25 years.....	27	Between 50 and 60 years.....	58
Between 25 and 30 years.....	38	Between 60 and 70 years.....	39
Between 30 and 35 years.....	43	Between 70 and 80 years.....	31
Between 35 and 40 years.....	51	Over 80 years.....	4
Between 40 and 45 years.....	55	Unknown .....	2

The reported duration of insanity was as follows:

Under 1 month.....	123	Between 3 and 5 years.....	21
Between 1 and 3 months.....	45	Between 5 and 7 years.....	10
Between 3 and 6 months.....	41	Between 7 and 10 years.....	2
Between 6 and 9 months.....	30	Between 10 and 15 years.....	3
Between 9 and 12 months.....	5	Over 15 years.....	4
Between 1 and 2 years.....	24	Unknown .....	65
Between 2 and 3 years.....	30		

Of those admitted during the year there were native born 326, foreign born 61, unknown 16. Of those remaining there were probably curable 93, possibly curable 185, chronic and probably incurable 1,134.

The recovery rate, based upon admissions, was 41.09. There were under treatment during the year 4 cases admitted under the voluntary commitment act. Of those 1 recovered, 2 improved and 1 remains in the hospital.

It is my belief that newer and more modern and humane methods of treatment have begun to show results. The percentage of recoveries is gradually growing, and the "improved" column steadily climbing. The dread disease, manifesting itself in conditions which we term insane, has been gradually succumbing to modern science.

The rate of increase in Ohio has been steadily diminishing for the past decade, although there are still a few alarmists crying out that insanity is increasing far out of proportion to the increase in population. And not only has insanity been somewhat checked in its ravages but the form of insanity has been so ameliorated that the dread and horror are almost things of the past. The patients now inhabit comfortable cottages, arranged and equipped for their comfort and cheer.

The armamentarium of the physician has been so elaborated that but little difficulty is ever experienced in quieting and soothing excited patients without the aid of depressing drugs. Hydrotherapy in all its forms is constantly in use, and is regarded by our staff as of more utility than all the other agents combined. Vibrassage, massage, electricity and calisthenics, all are regarded as valuable acquisitions to our armamentarium.

#### TRAINING SCHOOL.

Our training school course has been lengthened to three years. The curriculum now embraces practically everything which is of importance in the care of the sick and the defective. We are firm in our belief that the training school is a great factor in the advancement of modern methods. Nurses, like musicians, are "born, not made," but, like musicians, they require careful and constant training to develop their natural talents.

#### EMPLOYMENT AND DIVERSION.

We still regard employment and diversion as probably the chief means of restoring the insane to a normal and sane condition. Many patients who are restless, discontented and often mischievous, will become quiet, orderly and contented if given something to occupy their minds and give vent to their surplus energy; especially is this true if a little responsibility and authority is given them. We have a large acreage, upon which an immense amount of farm and garden products are raised, which is cultivated almost entirely by patients.

Many improvements have been made during the year, and labor of patients has been a large factor in the work. A new dairy barn has been constructed, and the old barn on the farm recently purchased has been converted into a cow barn. Both these stables have concrete floors and iron stalls, thus making them more sanitary than ordinary wooden construction. Their combined capacity is 118 cows.

New stokers have been installed under the remaining boilers. Large elevated bins with a capacity of 200 tons of coal have been built, crushers and elevators have been installed, so that now the coal is hoisted to the bins and runs to the stoker by gravity, thus greatly reducing the manual labor. The pressing need of propagating houses has been partially met by the construction of cheap substitutes by patients' labor. Copeland cottage has been wired for electricity and connected with the main plant.

The usual number of entertainments, dances, theatricals, concerts, "at homes," baseball, basket ball, bowling, croquet, lectures, motion picture shows, etc., have occupied us during the year.

#### REQUIREMENTS.

In addition to the usual requirements for current expense, etc., we should have appropriations for the following special items:

Our new dairy farm makes it possible to supply all the milk necessary for our use. The last legislature allowed us \$2,500.00 for the purchase of dairy cows. This was not quite half enough. We should have at least \$2,500 in addition for this purpose. This will be sufficient to increase our herd to one hundred cows, which, while not as many as we will eventually need, yet is all that we can properly care for with our present arrangements.

We have asked for a small appropriation for a propagating house for vegetables and flowers. This we regard as a necessity and feel that the appropriation should be urged. For the past several years we have had but a small appropriation for grading, cement walks, trees and shrubbery. Our grounds are so extensive that we have not been able to accomplish much with what has been allowed us. We should urge a more liberal appropriation.

An appropriation for an entrance drive would be of great utility. The gravel in this section disintegrates rapidly, and in consequence the roads need constant repairing. A more durable entrance drive should be built.

There has never been an appropriation for books and pictures for this institution. A small sum is respectfully urged for this purpose.

The appropriation most needed, however, is for a men's hospital. This hospital has been receiving patients for ten years; has grown in that time from a few cottages, and one hospital building, with a capacity of 300 patients, to a magnificent institution with a capacity of nearly 1,600. At the

beginning one hospital building was ample for both sexes, but with our present capacity it is absolutely impossible to properly care for the recent cases without another building constructed for the especial purpose of giving recent and curable cases the best care according to modern methods of treatment. We should have sufficient appropriation to construct a fire proof building, with a capacity of not less than 120. This, according to careful estimate, would require \$125,000.00.

## OFFICIAL STAFF.

. .

Dr. John E. Russell, who had been a member of our board of trustees for nine years, was succeeded by Mr. George L. Fordyce of Youngstown. Dr. Russell's retirement means the breaking up of a long and pleasant association. He was constantly at the post of duty and a proved champion of all that means the betterment of the service, a friend to the patients, employes and officers, and an inspiration to all.

Dr. Chetwynd was promoted from interne to a place upon the staff.

## EXPENSES.

The per capita cost per annum, based upon total disbursements except ordinary repairs and permanent improvements, was \$144.74. Based upon current expenses and officers' salaries was \$125.33. This is about \$7.00 per capita higher than last year, and is accounted for practically in two items, namely, the increased wage scale adopted by the hospital officials something more than a year ago, and the fact that our potato crop was almost a failure last year, necessitating the larger expenditure for groceries and other food stuffs. We are not aiming to make this a "cheap" hospital, but we do aim to make one hundred cents purchase a dollar's worth of goods.

Comparative cost since opening of the hospital, including current expense and officers' salaries:

1899.....	\$214 29	1904.....	\$139 49
1900.....	168 29	1905.....	114 84
1901.....	141 81	1906.....	117 69
1902.....	144 39	1907.....	118 83
1903.....	149 83	1908.....	125 33

## ACKNOWLEDGMENTS.

It gives me pleasure to testify to the ability and zeal of all the members of the staff. Drs. Brown, O'Brien and Adair have charge of services, and Drs. Tatje, Alspaugh and Chetwynd give them able and conscientious assistance.

Mr. Dudley still performs the duties of steward with fidelity and care. I am under pesonal obligations.

I wish to thank the storekeeper, the supervisors, the attendants and employes generally for their unswerving devotion to duty, and to assure them one and all of our deep appreciation of their work.

To you, gentlemen of the board of trustees, I wish to especially express my heartfelt gratitude for the constant support given me. and the strong and cordial cheer in time of sore distress. For your kind encouragement and constant aid I am deeply grateful. We have striven to place this institution upon a high plane of usefulness, and with your continued aid and the blessing of the Great Ruler of all we confidently predict a still greater beneficence.

Respectfully submitted,

HENRY C. EYMAN,  
*Superintendent.*

November 15, 1908.

*Dr. Henry C. Eyman, Superintendent:*

I take pleasure in submitting a brief report from the Pathological department for the year ending November 15th, 1908.

During the year we held thirty-five autopsies, the majority of which afforded some interesting findings.

One case, that of an imbecile admitted with an enormous tumor of the thyroid gland, death resulting in a few weeks from asphyxiation due to pressure of the growth upon the trachea. At post-mortem was found an enormous sarcoma weighing 960 grams, extending deep into the tissues of the neck. In its center the trachea was found compressed.

Another case, one of acute lymphatic leukemia, with diffuse glandular enlargement, the leucocyte count varying from 385,000 to 600,000, running a very rapid course. At post-mortem we found diffuse endocarditis with aortitis.

During the past few years our attention has been more closely drawn to the study of urinary lesions, particularly disease of the kidneys and its relation to the existing mental condition, the finding of albumen and casts in a large percentage of cases admitted, a fair percentage with pyuria. The improvement mentally as the renal symptoms subside lead us at times to regard kidney disease as one of the factors in the causation of certain forms of mental trouble. In 80% of the autopsies held during the year we found the kidneys disased, varying from active congestion to chronic interstitial nephritis, the most prevalent form being chronic parenchymatous nephritis.

During the past year considerable time has been devoted to the application of vaccine therapy in the treatment of certain disease conditions. We still continue to devote much time to the study of "paresis," accounts of which have been published from time to time. The results attained by the use of vaccine and serum therapy in this disease are very promising.

Respectfully submitted,

JOHN D. O'BRIEN,  
*Pathologist.*
